THE TOOLS TO TRUST

THE TOOLS TO TRUST

Eclipse was founded in the City of Sheffield which is famous for the production of steel, cutlery and hand tools and continues to be our home over 250 years later.

In 1889, James Neill formed his own company adopting the Eclipse brand name. Initially manufacturing steel, he moved on to manufacture machine knives, woodworking tools and hacksaw blades, for which the company is best known.

The Spear & Jackson range was developed independently of Eclipse branded products until 1985 when James Neill acquired the Spear & Jackson group, subsequently renaming the company as Spear & Jackson.

Whilst the Spear & Jackson brand is probably best known in the UK for our unparalleled range of quality hand, garden and contractors tools, Eclipse is recognised worldwide as the professionals' choice for metal cutting and machinery workshop hand tools.

As you would expect with over 100 years of experience, the Eclipse product range has widened to accommodate natural product extensions, such as holesaws, jigsaw blades, reciprocating blades, locking jaw pliers, bolt and cable cutters, aviation snips, riveters, vices, heavy duty woodworking and metalworking clamps, engineers hand tools, plumbing tools, adjustable wrenches, hose clips and torque control tools. All designed and manufactured to the highest possible quality standards.

We offer excellent customer service in the UK and export markets via a global network of representative's and distributors in over 80 countries.

Spear & Jackson UK is a division of the Spear & Jackson Group, which includes brands such as:

- Moore & Wright
- Eclipse Magnetics
- Bowers
- Baty
- Robert Sorby

The Spear & Jackson Group have operating companies in the UK, North America, France, China, Australia and New Zealand.

Throughout the development of the Eclipse brand, the company has continued to innovate and embrace new ideas and applications, whilst combining new and traditional materials to create reliable, high quality, functional tools at affordable prices, creating our enviable reputation as a supplier of **the tools to trust**.

Eclipse Quality Guarantee

*Eclipse Professional Tools are warranted to be free from defects in material and workmanship for the life of the tool under normal conditions of use, excluding damage arising from misuse or alteration. Your statutory rights are not affected.

The Official Mark of Quality

Dedication to quality has earned official accreditation of the BSEN ISO 9001:2015 Quality Assurance Certificate for the general manufacture of all our hand tools. This represents another important milestone in NEILL TOOLS history, since this is internationally recognised as a mark of quality. In addition, we guarantee all our tools and products against defective workmanship and materials so you can be sure of first-class performance.

Eclipse Metal Cutting

Eclipse is the number one name in metal cutting.

Our hacksaw blades are manufactured to the highest quality standards and deliver unparalleled cutting performance. A comprehensive range of saw frames complement the hacksaw blades to offer the professional a complete metal cutting solution.

Eclipse Predator Hand Hacksaw Blades

A new generation of bimetal hacksaw blades

Eclipse Predator blades feature precision ground teeth with a positive rake angle and a smooth gullet for effective material removal. This creates a more aggressive and faster cut and a blade that stays sharper for longer. The teeth are ground to very fine tolerances which achieve significantly higher cutting efficiency than standard blades and meet the needs of the most demanding professional.

ECLIPSE
PREDATOR™

Market leading professional quality hand hacksaw blades, available in All Hard (HSS) and bimetal (shatterproof) qualities.

Predator Flexible Bimetal HSS

A virtually unbreakable blade for superb cutting performance, wear resistance and safety. Eclipse Predator blades feature precision ground teeth with a positive rake angle, and a smooth gullet for effective material removal, creating a more aggressive and faster cut and a blade that stays sharper for longer.

- Faster cut than standard bimetal Hacksaw Blades
- Longer Life
- Sharper first cut
- Shatterproof Blade

Hand Blade Tooth Pitch Selection

To select the hacksaw blade with the correct number of teeth for the task, consider the following elements:

How thick is the material to be cut?

For thin sections, the highest number of teeth should be used

What type of material is to be cut?

The table below is a guide to tooth pitch selection for different materials and various thicknesses

Saw Frames Range

A choice of hacksaw frames designed for the professional user for cutting a wide range of metals and other materials, including the 70-24TR high tension saw frame with a quick blade change mechanism.

A choice of hacksaw frames designed for the professional user for cutting a wide range of metals and other materials, including the 70-24TR high tension saw frame with a quick blade change mechanism.

70-24TR High Tension Professional Saw Frame

Aluminium frame is lightweight, strong and durable resulting in less fatigue during prolonged use. It can maintain blade tension up to 200 Kg force to ensure accurate and straight cutting performance. Features a quick blade change mechanism to save time in the workshop and an alternative 45° blade mounting for flush cutting. It is supplied with an Eclipse shatterproof bimetal 24TPI blade.

Part No.	Length	Height	Pack Qty.	Box Weight (kg)
70-24TR	410mm (16")	150mm (6")	6	4.0

70-20TR/20TND Saw Frames

"The original" 70-20TR. Strong, tubular frame complete with a die cast handle for greater comfort and control when sawing. Maintains optimum blade tension to ensure accurate and straight cutting performance. It is supplied with an Eclipse shatterproof bimetal 24TPI blade, suitable for cutting most metals and plastics. Available in packs of 5's or 20's.

Part No.	Description	Length	Height	Pack Qty	Box Weight
70-20TR	Prof. Hacksaw	465mm (18 ³ / ₈ ")	130mm (5")	5	3.85kg
20TND	Prof. Hacksaw	465mm (18 ³ / ₈ ")	130mm (5")	20	14.75kg

70-22TR Saw Frame

The 70-22TR Hacksaw Frame has a soft-feel handle, powder coated moulded section steel frame. It is supplied with an Eclipse shatterproof bimetal 24TPI blade.

Part No.	Length	Height	Pack Qty.	Box Weight (kg)
70-22TR	400mm (16")	132mm (5.1")	5	3.6

Alternative saw frames offering great value for money suitable for cutting a wide range of metals and other materials.

40PG30 Saw Frame

A traditional pistol grip hacksaw with die cast handle and solid frame. It is supplied with an Eclipse shatterproof bimetal 24TPI blade.

Part No.	Length	Height	Pack Qty	Box Weight
40PG30	485mm (19")	120mm (4 ³ / ₄ ")	5	3.50kg

18TND Saw Frame

Lightweight and strong mild steel box section frame with a die cast handle for strong grip. It is supplied with an Eclipse shatterproof bimetal 24TPI blade.

Part No.	Length	Height	Pack Qty	Box Weight
18TND	443mm (17 ³ / ₈ ")	132mm (5 ¹ / ₄ ")	10	4.4kg

16TND Saw Frame

A lightweight, economical hacksaw frame with a strong, box section tubular steel frame and a comfortable and durable cast aluminium handle. In addition, the extra long location pin gives increased security of the tensioning bit. It is supplied with an Eclipse shatterproof bimetal 24TPI blade.

Part No.	Length	Height	Pack Qty	Box Weight
16TND	430mm (16.9")	132mm (5 ¹ / ₄ ")	10	4.4kg

70-400R/400ND Saw Frame

Tubular steel frame and comfort grip plastic handle supplied with an Eclipse flexible silicon steel blade.

Part No.	Length	Height	Pack Qty	Box Weight
70-400R	400mm (15 ³ / ₄ ")	130mm (5")	5	2.5kg
400ND	400mm (15 ³ / ₄ ")	130mm (5")	20	9.20kg
400NDB*	400mm (15 ³ / ₄ ")	130mm (5")	20	9.20kg

* Supplied with an Eclipse shatterproof bimetal 24TPI blade.

Metal Cutting Saw Frames

Junior hacksaw frames available with a choice of handle types for wood and metal cutting, pad saws for cutting in restricted areas and general purpose saws for wood and plastic cutting. The 15TND is ideal for use in awkward or restricted areas.

15TND Mini Saw Frame

Mini hacksaw frame ideal for use in awkward or restricted areas. Strong aluminium frame for extra durability. Easy blade changing mechanism without the need for extra tools. Blade length can be changed to enable 80% of the blade to be used increasing cutting efficiency. It has an ergonomic soft grip handle with a thumb grip. It is supplied with an Eclipse shatterproof bimetel 24TPI blade.

Metal Cutting Specialist Saw Frames

A range of specialist saw frames for cutting and shaping various materials such as wood, bone, plastics and jewellery.

70-130R Padsaw

Padsaw for sawing in confined places. Diecast handle supplied with 2 blades, one for wood cutting and one for metal. The handle can hold the blade in one of two positions for maximum flexibility in use. Ideal for cutting out keyholes and letterboxes.

Part No.	Length	Height	Pack Qty	Box Weight
70-130R	276mm (10 ⁷ / ₈ "	110mm	5	1.40kg

70-CP1R Coping Saw

Coping saw for cutting and shaping in wood. Comfortable wooden handle and steel frame. Blades can be positioned at any angle to the frame. Supplied with Eclipse 14tpi Coping Saw blade.

Part No.	Length	Height	Pack Qty	Box Weight
70-CP1R	315mm (12 ³ / ₈ "	130mm (5 ¹ / ₈ "	5	1.50kg

70-CP1RSF Coping Saw

Coping saw for cutting and shaping in wood, with a soft-feel handle for extra comfort and steel frame. Blades can be positioned at any angle to the frame. Supplied with Eclipse 14tpi Coping Saw blade.

Part No.	Length	Height	Pack Qty	Box Weight
70-CP1RSF	317mm (12 ³ / ₈ "	317mm (12 ³ / ₈ "	5	1.50kg

70-FS1R Fretsaw

Fretsaw for fine cutting work in thin materials such as wood, bone, plastics, etc - ideal for professionals and hobbists. Comfortable wooden handle and steel frame. Supplied with Eclipse 16tpi Fretsaw blade.

Part No.	Length	Height	Pack Qty	Box Weight
70-FS1R	270mm (10 ⁵ / ₈ "	300mm (11 ⁷ / ₈ "	5	2.05kg

PS51 Piercing Saw

Piercing saw for use in fine metal work such as jewellery. Comfortable wooden handle and steel frame. Supplied with Eclipse 32tpi Piercing Saw blade.

Part No.	Length	Height	Pack Qty	Box Weight
PS51	292mm (11 ¹ / ₂ "	95mm (3 ³ / ₄ "	5	0.90kg

Specialist Cutting Range

Eclipse features a wide range of specialist cutters and snips for the manual cutting of bolts, wire, cables, sheet metals, copper, silver and gold.

Cutting Bolt & Wire Cutters

High tensile Bolt Cutters, available in a range of sizes, with a choice of tubular or solid forged handles.

Bolt Cutters - High Tensile, Tubular Handles

High tensile - for cutting hard materials up to 50HRC. Centre cut, arm adjusted bolt cutters with lightweight tubular handles that do not compromise strength – every pound of force applied is amplified to produce 80lbs (36kg) of force between the jaws. To maximise safety the built in stops will yield rather than break, whilst the drop forged jaws are machined to precise specifications for a resilient body and rigid cutting edge.

Specialist cutters for shearing bolt heads and cutting wire, rope and cable.

EBC-EC24 End Cut Bolt Cutter - 24"/600mm

Pincer movement makes the bolt cutter ideal for cutting in restricted areas or where a side cut is difficult, eg when cutting off bolt heads. Jaws are drop forged and machined to precise specifications for a resilient body and rigid cutting edge. Handles are solid forged and incorporate safety stops that will yield rather than break.

Part No.	Total Length	Max Cutting Capacity	Pack Qty
EBC-EC24	600mm (24")	7.9mm (5/16")	4

ECC16 Cable Cutters - 24"/600mm

For cutting 16mm wire rope and up to 21mm armoured cable. The lightweight tubular steel handles reduce user fatigue during prolonged use, whilst the rubber hand grips reduce the risk of slippage. The jaws have hardened cutting edges for easy cutting.

Part No.	Total Length	Max Cutting Capacity	Pack Qty
ECC16	600mm (24")	16mm wire rope and up to 21mm armoured cable	4

EWK8 Wire & Rope Cutter - 8"/200mm

Suitable for a multitude of agricultural, garden, automotive and marine cutting tasks. Angled and hardened blades ensure a clean cut, whilst the spring loaded head gives a fast, smooth cutting action. Rubber handles reduce the risk of slippage.

Material	Recommended Capacity
Mild steel strand	6.5mm
High tensile steel rope (180kg/mm²)	5.0mm
Soft steel wire (34kg/mm²)	5.0mm

Cutting General Purpose & Jewellers' Snips

Resharpenable General Purpose Snips, precision hollow ground for easy cutting of sheet metal. Jewellers Snips suitable for cutting copper, silver and gold.

ESGP General Purpose Snips

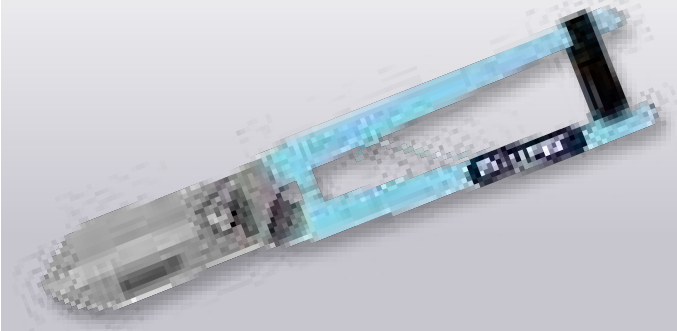

For cutting sheet metal. The precision hollow ground blades reduce friction for an easy cutting action and, since they are also induction hardened and tempered, they can be easily re-sharpened. The spring loaded nut allows for easy adjustment to increase the working life, whilst the high quality steel drop forged handles offer maximum strength.

Eclipse Power Tool Accessories

Eclipse features a wide range of Power Tool Cutting Accessories including Jigsaw Blades, Holesaws and Reciprocating Saw Blades. These can be used on a range of materials including metal, ceramics, wood, plasterboard, and plastics.

Cutting Jigsaw Blades

Eclipse Predator Jigsaw blades have unrivalled cutting speed and life and can tackle almost all cutting tasks using a power jigsaw. The Universal “T” Shank type fits most leading brand Jigsaw machines. Each pack contains 5 blades.

Eclipse Predator Reciprocating Saw Blades.

Outstanding cutting performance to meet the needs of the most demanding professional. All blades have a Universal fitting to fit most popular reciprocating saw machines. Each pack contains 5 pieces*.

*TC - Tungsten Carbide blade is only available in a 1 piece pack

Cutting Reciprocating Saw Blades

Choosing the right blade...

HCS - High Carbon Steel

- Made from High Carbon Steel specially designed for wood cutting in terms of hardness and resistance.
- Highly suitable for other soft materials such as laminated chipboards and soft plastics.

Cuts Wood and Plastic

Bimetal

- High performance bimetal blades featuring an electron beam welded heavy duty bimetal construction.
- They combine a M42 HSS steel cutting edge containing 8% Cobalt for aggressive long lasting teeth welded to a flexible alloy spring steel backing.
- This ensures a virtually unbreakable blade, which stays sharper for longer providing superb cutting performance, wear resistance and safety.
- Highly suitable for cutting sheet metal, metal pipes, profiles as well as wood with nails, plastics and reinforced plastics
- Include heavy duty blades for demolition work

Cuts Metal

Cuts Wood & Metal

TC - Tungsten Carbide

- Special blade with Tungsten Carbide tipped teeth designed to allow easy and fast cuts through construction materials such as brick, porous concrete and masonry.

Eclipse Predator TCT Multi-Purpose Holesaws

Multi-Purpose TCT Holesaws and Accessories for fast cutting of wood, plastics, MDF, plasterboard, dry wall, soft ceramics and aerated concrete.

- TCT (Tungsten Carbide Tipped) holesaws are up to five times faster than bimetal holesaws when used for cutting wood
- A wider tooth profile helps clear material for a longer life
- No 'cut burn' on wooden workpieces
- Dedicated arbors with extended length HSS and TCT tipped pilot drills

EMVSB Swivel Bases

- Includes three mount holes for attaching to a workbench
- For use with Eclipse Mechanics' Vices

EFG Fibre Grips

- A range of high quality fibre grips for use with Eclipse Mechanics' Vices.
- Prevents damage to workpieces with soft or polished surfaces.
- Supplied in pairs.

EMV-JPS Spare Jaw plates

- Replacement hardened steel jaw plates with fine knurl grip pattern to fit EMV series vices.
- Supplied as a pair with 4 screws for easy fitting.

EQRV
Quick Release Mechanics Vice

High quality specialist Cast Iron Mechanics Vices with quick release features and multi-purpose vices for flexible working.

Strong and durable precision cast iron body with hardened steel jaw plates. Up to 4000kg of clamping force is achievable for medium to heavy duty metalworking and pipe jaws are included for specific pipe work.

It features an effortless quick release lever mechanism that ensures the vice can be opened and closed without using the main screw allowing rapid movement of the slide. This allows for workpieces to be quickly interchanged saving time in the workshop.

It includes a convenient anvil at the rear of the body for beating and hammering workpieces, 360° swivel rotation and a 3 lug heavy duty reinforced base. Available in 4" 5", 6" and 8" Jaw widths

EWWPS Plain Screw Woodworking Vices

Plain screw mechanism works through a separate unbreakable nut housed beneath the body seating, to ensure the constant alignment of the screw mechanism.

Precision machined grey cast iron body and front to ensure a smooth, parallel action. Fitted with an adjustable front stop, or dog, that gives an additional clamping facility when used with a bench stop, to provide a normal vice and a tail vice in one tool.

To increase safety, the fused tommy bar will bend before the vice can become over-stressed.

Up to 1900Kgf clamping force is achievable and is ideal for holding large pieces of wood for cutting and gluing

EOHBC-HD Heavy Duty One Handed Bar Clamps and Spreader

Lightweight Aluminium frames and carbon steel bar are strong and durable and the clamps are capable of achieving up to 300 kg of sustainable holding force and are ideal for heavy duty work holding applications.

The quick release insert trigger enables the clamp to be quickly positioned and released, whilst the easy push button system allows quick change from a clamp to a spreader.

The removable pads stay fixed to the clamp giving an even distribution of clamping force across the workpiece protecting it from marking damage.

EOHBC Original Series One Handed Bar Clamps and Spreaders

Average clamping force of 150kg. Quick release trigger enables the clamp to be quickly positioned and released, whilst the jaw release clip mechanism allows the jaw to be removed and re-attached to the other end of the bar, thus converting the clamp into a spreader.

The carbon steel bar and reinforced nylon body make it both tough and durable, whilst the ergonomically designed, soft feel pistol grip handle fits easily into the hand.

In addition, the toe-in feature means that, when fully closed, the jaws only meet at the top, thus providing an even clamping force across the whole depth of the workpiece. Non-marking pads firmly grip and protect the workpiece.

EOHBC-MINI and EOHBC - MICRO Mini and Micro One handed bar clamps

Strong plastic construction and carbon steel bar are strong and durable and allow the MINI clamp to achieve up to 75 kg and the MICRO clamp to achieve up to 25kg clamping force.

They are ideal for small wood working projects, working in confined spaces and delicate work requiring light pressure.

The MINI clamp features an easy push button system and allows a quick change from a clamp to a spreader.

The quick release insert trigger enables the clamps to be quickly positioned and released and the removable pads stay fixed to the clamp giving an even distribution of clamping force across the workpiece protecting it from marking damage.

Eclipse Heavy Duty Parallel Jaw Woodworking Clamps

The Eclipse range of Heavy Duty Parallel Jaw Woodworking Clamps are ideal for heavy duty wood working applications such as furniture and cabinet manufacturing. Available in a range of six sizes capable of achieving up to 600 kgf of clamping force.

Workholding Solutions Clamps

Eclipse Heavy Duty Parallel Jaw Woodworking Clamps

Metal reinforced plastic housing for maximum strength capable of achieving up to 600Kgf of clamping force. An anti-slip system on the high quality extra strong 29 x 19mm profiled steel bar prevents the clamp from slipping in use. The large parallel clamping surface with protective pads ensures even distribution of force and protection of delicate workpieces and the clamp may be easily converted to a spreader without the need for other tools. An ergonomic handle ensures comfortable use. Available in six sizes: 12", 24", 32", 40", 50" and 60" clamping capacities and 95mm throat depth.

Eclipse Heavy Duty Parallel Jaw Metalworking Clamp

Heavy duty metal working clamps capable of up to 1200Kgf clamping force.

High quality steel bar 30mm wide x 15mm thick ensures optimum strength. A hex design screw end reinforces clamping.

The heat-treated circular pressure clamping plate features a full ball type support which may be tilted 35degrees to withstand heavy duty working and giving the ability to clamp awkward shaped work pieces.

Available in five sizes: 10", 12", 16", 20" and 24" clamping capabilities and 140mm throat depth.

Quality Testing for W1 Mild Steel and W4 304 Stainless Steel Hose Clips Tested in accordance with BS5315:1991

Torque Tests

- Hose clips are checked in production to ensure all products have low free turning torque but maintain high destructive torque.
- British Standard states that free turning torque should be less than 1.5 Nm and that maximum torque before destruction should be greater than the value of maximum torque as shown in the tables overleaf.

Corrosion Resistance Tests

- Hose clips are checked for corrosion resistance with a salt spray test in a chamber.
 - W1 corrosion resistant > 144 hours
 - W4 corrosion resistant > 500 hours

All Eclipse Hose Clips are manufactured to the highest standards and exceed the manufacturing standards required to meet BS5315:1991

Pressure Tests

- Hose Clips are checked in production to ensure that they are circular in shape and can be sealed tightly on a hose.
- A hydraulic pressure test is carried out to ensure the clips can seal tightly and function correctly under high pressure.
- British Standard states the clamp should be stable in excess of the pressures imparted below in the table depending on the diameter of the clamp.

Eclipse W1 Mild Steel Hose Clips

Ideal for general purpose usage in automotive, agriculture, hardware / DIY, Construction, gardening and many applications where a medium requirement of corrosion resistance is required.

- W1 wormdrive hose clips are manufactured from the finest cold rolled mild steel with zinc plated surface treatment for a degree of corrosion resistance.
- Corrosion resistance tested in salt spray test > 144 hours
- They are fully serrated enabling extra flexibility when adjusting the clip to the correct size.
- Bright Silver plated finish with full serrations.
- Trivalent Chromate plating Cr3) for ROHS compliance
- 7mm Slotted screw for ease of use
- The band is processed to erase any burrs from the edges and to increase strength ensuring a high destructive torque
- The band thread is cold formed and results in a smooth underside surface profile to optimise hose protection, especially for protecting soft hoses from damage during installation, providing exterior hose wall protection
- The housing is riveted for extra strength and provides smooth contact with the hose.

Eclipse W4 304 Stainless Steel Wormdrive Hose Clips

Ideal for various Industrial, Construction, automotive, agricultural, hardware / DIY and many applications where a high requirement for corrosion resistance is required.

- W4 wormdrive hose clips are manufactured from the finest 304 grade stainless steel (Austenitic grade 18% Chromium / 8% Nickel) for a high degree of corrosion resistance
- Corrosion resistance tested in salt spray test > 500 hours
- Bright Silver plated finish with partial serrations
- Trivalent Chromate plating Cr3) for ROHS compliance
- 7mm Slotted screw for ease of use

- Available in 5 piece and 10 piece boxes
- Larger sizes packaged in plastic bags
- Counter top point of sale display unit available.

Eclipse Gripping and Plumbing Tools

Wrenches and plumbing tools manufactured from the highest quality materials to the finest tolerances for optimum performance. A complete solution for the plumbing, installation and automotive industries.

A wide range of Pipe Wrenches to suit the majority of applications and user preferences.

ELPW Leader Pattern Pipe Wrenches

The frame and handle are made from a one piece ductile iron casting which is guaranteed unbreakable, whilst the flash hardened teeth increase wear resistance. The hardened and tempered steel adjustment nut gives a longer working life and the precision machined screw thread and spring jaw remain open until pressure is applied. Conforms to British Standard BS3594.

Size	Open Length	Pipe Capacity	Box Qty.
ELPW8	200mm (8")	25mm (1")	4
ELPW10	250mm (10")	38mm (1½")	4
ELPW12	300mm (12")	51mm (2")	4
ELPW14	350mm (14")	51mm (2")	4
ELPW18	450mm (18")	63mm (2½")	4
ELPW24	600mm (24")	76mm (3")	1
ELPW36	910mm (36")	127mm (5")	1
ELPW48	1200mm (48")	152mm (6")	1

ESPW Stillson Pipe Wrenches

The hardened and tempered hook jaw eliminates breakage, whilst the flash hardened teeth increase wear resistance. The nut abutment means that all loading is transferred direct from the handle to the nut and jaw via the nut abutment, ensuring that the frame is not load bearing, thus reducing the possibility of frame failure. Conforms to British Standard BS3594.

Size	Open Length	Pipe Capacity	Box Qty.
ESPW8	200mm (8")	19mm (¾")	6
ESPW10	250mm (10")	25mm (1")	6

ESWDPW3	695mm (27⅞")	75mm (3")	1

ECPW Chain Pipe Wrenches

An adjustable pipe wrench that turns a pipe in either direction. Ideal for use on round, square, or irregular shapes in confined spaces, eg when a pipe is in a trench or against a wall. Drop forged steel jaws are both hardened and tempered for maximum strength. The tensile steel chain loops quickly around the pipe and, once locked, holds it in place to prevent slippage. Only the teeth on the face of the handle bite into the pipe, meaning that, when these become worn, the jaws can be reversed to double the life of the tool. Drop forged steel cylindrical handle.

A choice of Adjustable Wrenches for a variety of applications, manufactured to the highest standards and quality.

ADJW Adjustable Wrenches - Professional

Specially designed for the Professional user. Ideal for use in plumbing, installation and automotive industries. Exceptionally quick adjusting screw to move the scaling jaw. Left handed screw thread and super thin head with wide jaw opening to allow use in confined spaces.

Size	Length	Jaw Width	Pack Qty.
ADJW6L	150mm (6")	24mm	6
ADJW8L	200mm (8")	28mm	6

ADJW24L	600mm (24")	70mm	1

ADJW Adjustable Wrenches - Extra Wide Jaws

Ideal for use in plumbing, installation and automotive tasks. Not only does the extra wide jaw opening increase versatility, but the super thin head means that the wrench can be used in confined spaces. In addition, the throat depth is deeper than standard adjustable wrenches and the head is angled to offer maximum speed and efficiency. Soft grip handle for added comfort.

Gripping & Plumbing Tools

Pipe Vices & Cutters

Pipe Slicers and tube cutters for plastic, copper, brass, aluminium and mild steel. Pipe Vice for repetitive clamping tasks.

EHPV Hinged Pipe Vices

Ideal for repetitive clamping tasks on pipework. Can be fitted to a bench or a stand. The hinged top section allows rapid access to the job, whilst the self locking frame is reversible for right or left-handed operation. The steel tommy bar and main screw exert and maintain a powerful gripping force and the SG ductile iron frame is guaranteed unbreakable.

Part No.	Open Length	Box Qty.
EHPV2	10-50mm (3/8" - 2")	4
EHPV2-1/2	10-60mm (3/8" - 2 1/2")	4

EHPV6	16-150mm (5/8" - 6")	1

ECPS Copper Pipe Slicers

For cutting copper tubing. Single handed operation - ideal for use in confined areas, for example where there is limited space between the wall and copper pipes. Two sizes available for use with 15mm and 22mm copper tube.

Part No.	Cutting Capacity	Box Qty.
ECPS15	15mm (0.6")	10
ECPS22	22mm (0.9")	10

ECTC22 Mini Tube Cutter

For cutting 3-22mm (1/8" to 7/8" o.d.) copper and aluminium tubing. Specifically suited to small bore tubing. The compact size makes the mini tube cutter ideal for use in confined spaces. Quickly adjusts to the required cutting position.

Part No.	Cutting Capacity	Box Qty.
ECTC22	3-22mm (1/8 - 7/8")	10

ECTC Telescopic Tube Cutters

For cutting copper, brass, aluminium and light gauge steel tube. Makes clean, fast cuts, leaving little fash to clear away. The feed screw does not expand during use, so telescopic tube cutters are ideal for use in confined spaces. Each cutter includes an integral deburrer and a spare cutting wheel.

Part No.	Cutting Capacity	Box Qty.
ECTC32	3-32mm (1/8 - 1 1/4")	5
ECTC50	5-50mm (3/16 - 2")	5

Gripping & Plumbing Tools

Pipe Cutters & Hand Benders

Cutters for plastic, steel and cast iron. A hand bender for site bending copper tube.

EPPC Plastic Pipe Cutters

Ensure clean cuts without distortion to the plastic tubing. For cutting PVC, polythene, MDP and polyethylene pipe, HEP 20, plastic overflow pipe and rubber hoses.

- High quality stainless steel blades
- Ratchet system ensures a fast, efficient cut.
- Two sizes available; 32mm and 42mm.

Part No.	Cutting Capacity	Box Qty.
EPPC32	32mm (1 1/4")	10
EPPC42	42mm (1 5/8")	10

ERP2 Roller Pipe Cutter

For cutting steel and cast iron pipe.

- Frame made from unbreakable SG Ductile iron.
- Two rollers keep the cutter squarely on track, whilst also rolling down burr to leave a clean cut
- Includes a hardened steel cutting wheel and a steel main screw that applies a firm pressure, creating a clean cut
- A safety stop prevents the cutting wheel from being damaged by the rollers.

Part No.	Cutting Capacity	Box Qty.
ERP2	3-50mm (1/8 - 2")	1

EHB6810 Mini Pipe Bender

Compact tool suitable for bending 6,8 and 10mm copper pipe, aluminium, brass and other non ferrous metal tubing

- Manufactured from carbon steel for strength and durability
- Features a calibration scale for easy accurate bending or right, left and offset bends up to 180°
- Ideal for plumbers and engineers installing central heating, air conditioning, refrigeration and other general installation jobs

Part No.	Pipe Capacity	Box Qty.
EHB6810	6, 8 and 10mm	10

EHB Hand Bender & Accessories

A compact tool for bending 15mm and 22mm o.d. copper tube. Ideal for on site operation. Supplied with 15mm and 22mm formers and guides.

Part No.	Pipe Capacity	Box Qty.
EHB1522	15-22mm (9/16 - 7/8")	1
EHBG15	15mm Guide	24
EHBG22	22mm Guide	4
EHBF15	15mm Former	10
EHBF22	22mm Former	10

9350 Deburring Tool

A multifunctional tool capable of holding a range of different blades, coarse to fine, for external and internal deburring operations. Easy to operate chuck allows for quick blade changeover.

DB1/DB2 Blades

DB1 - Heavy Duty HSS blade for steel and aluminium.
DB2 - Heavy Duty HSS blade for brass and cast iron.

- Capable of right and left hand cuts.
- All blades are ground from quality high speed steel, heat treated for maximum tool life and designed for safety with unique rounded heads.

Locking Jaw Pliers and C-Clamps

Gripping & Plumbing Tools

Locking Jaw Pliers

A wide choice of Locking Pliers for different applications in a range of sizes.

Straight Jaw Locking Pliers

Designed for use with flat, square and hex workpieces. Ideal for welding, HVAC, plumbing, automotive, electrical and woodworking projects.

Part No.	Size	Max Jaw Capacity	Box Qty.
E7R	175mm (7")	34mm (1 ⁵ / ₁₆ ")	5
E10R	250mm (10")	45mm (1 ³ / ₄ ")	5

Curved Jaw Locking Pliers

Designed for gripping and clamping round surfaces.

Part No.	Size	Max Jaw Capacity	Box Qty.
E10CR	250mm (10")	45mm (1 ³ / ₄ ")	5

Curved Jaw Locking Pliers with Wire Cutters

Designed for gripping and clamping round surfaces. Incorporates a wire cutter.

Part No.	Size	Max Jaw Capacity	Box Qty.
E5WR	125mm (5")	32mm (1 ¹ / ₄ ")	5
E7WR	175mm (7")	34mm (1 ⁵ / ₁₆ ")	5
E10WR	250mm (10")	45mm (1 ³ / ₄ ")	5

Long Nose Locking Pliers With Wire Cutters

Particularly suited for clamping and tightening bolts in confined spaces. Also ideal for precision work. Incorporates a wire cutter.

Part No.	Size	Max Jaw Capacity	Box Qty.
E6LN	150mm (6")	51mm (2")	5

11" Locking Table C-Clamp

Ideal for clamping and workpieces when drilling, milling, welding and gluing.

- Suitable for fixing on machinery T Slots, tables and workbenches
- Swivel jaw pads minimise marking of delicate workpieces
- Chrome Molybdenum steel body and handles for strength and durability
- Guarded release trigger protects against accidental release
- Screw adjusts to fit work piece giving an even pressure

Part No.	Size	Max Jaw Capacity	Box Qty.
E-11TSC	275mm (11")	92mm (3 ⁵ / ₈ ")	5

Gripping & Plumbing Tools

Locking C-Clamps

C-Clamps and Locking Pliers for specialist use and working in confined spaces with awkward shapes.

Locking C-Clamps with Regular Tips

The wide opening jaws are designed to reach around and grip awkward shapes. Provide a deep reach.

Part No.	Size	Max Jaw Capacity	Box Qty.
E6R	150mm (6")	44mm (1 ³ / ₄ ")	5
E11R	275mm (11")	80mm (3 ¹ / ₈ ")	5

Locking C-Clamps with Swivel Pads

The wide opening jaws are designed to reach around and grip awkward shapes whilst the swivel pad protect delicate workpieces from damage. Provides a deep reach.

Part No.	Size	Max Jaw Capacity	Box Qty.
E6SP	150mm (6")	44mm (1 ³ / ₄ ")	5
E11SP	275mm (11")	80mm (3 ¹ / ₈ ")	5

Locking Welding Clamp

U-shaped jaws accurately align round and square shaped tubing when welding.

Part No.	Max Capacity	Box Qty.
E9R	44mm (1 ³ / ₄ ")	5

Locking Chain Clamp

Grips and holds awkward shapes up to 18"/455mm in diameter. Ideal for working with pipes in confined spaces, eg. up against a wall.

Part No.	Chain Size	Box Qty.
E20R	455mm (18")	5

E8R Locking Sheet Metal Tool

Grips and locks onto sheet metal when bending, forming and crimping.

Part No.	Size	Max Capacity	Box Qty.
E8R	200mm (8")	12.7mm (1/2")	5

Eclipse Spiralux Riveters and Threaded Insert Setting Tools

Eclipse Spiralux is recognised as a brand leader for hand riveters, with a well established range sold in markets across the globe. The Eclipse range offers a selection of models designed for light industrial and engineering use.

The Compact Series has been developed to complement the more traditional range. They are smaller and lighter than traditional hand riveters but are equally strong and durable. They are quick and easy to use and require considerably less physical effort to pop rivets.

Compact Series Riveters

MORE POWER LESS EFFORT

NEW

Riveters

Compact Series Riveters

2750C - Compact Lazy Tong Riveter

25% lighter, smaller and easier to handle than traditional sized lattice riveters. Weighs 1.50Kg compared to a 1.90Kg traditional lattice riveter. Delivers more power with less effort. Much easier on the arms and shoulders when popping lots of rivets.

NEW

- Strong 3-piece alloy steel jaw mechanism with hexagonal internal structure for a longer life and easy operating
- Aluminium alloy ergonomic design body and ABS handle for comfortable handling
- Lattice section is held together with nuts and bolts for extra strength and durability
- Manually adjustable round knurling sleeve to easily adjust the working length of each stroke, ideal for use in restricted spaces
- Pops up to 6.4mm Aluminium, Steel and Stainless Steel rivets
- Contains rivet noses for use with 2.4mm, 3.2mm, 4.0mm, 4.8mm and 6.4mm aluminium and steel rivets
- Noses are colour coded by size for easy identification and may be conveniently changed by hand with no need for extra tools
- To operate, pre-drill holes into the items being joined together, the optimum drill size is 0.1mm bigger than the size of the rivet
- Spare replacement jaws and noses are available

2760C - Compact Lever Arm Riveter

Up to 40% Lighter and more compact in size than traditional long arm riveters. Requires less effort and is easier to use. Much easier on the arms and shoulders when popping lots of rivets

NEW

- Strong 3-piece alloy steel jaw mechanism with hexagonal internal structure for a longer life and easy operating
- Reinforced 2mm thick Carbon Steel heat-treated handle for extra strength and durability
- Ergonomically designed handles for comfortable use
- Features a convenient rivet stem collector for protection and safety
- Contains rivet noses for use with 2.4mm, 3.2mm, 4.0mm, 4.8mm and 6.4mm aluminium and steel rivets
- Noses are colour coded by size for easy identification and may be conveniently changed by hand with no need for extra tools
- To operate, pre-drill holes into the items being joined together, the optimum drill size is 0.1mm bigger than the size of the rivet
- Spare replacement jaws and noses are available

A wide range of manually operated Riveters suitable for maintenance and assembly operations. Heavy duty Lazy Tong and Long Arm Riveters can be used with 3 - 6mm Rivets and ¼” Monobolts.

2760 Long Arm Riveter

Long arms reduce the effort required to set rivets. Probably the most powerful industrial hand riveter available today. Ideal for boat building & coachwork, agricultural machine maintenance, etc. Supplied with 4 interchangeable noses.

Part No.	For use with rivet sizes:	Pack Qty.
2760	4.0mm (5/32"), 4.8mm (3/16"), 6.4mm (1/4")	1

2750 Lazy Tong Riveter

Powerful and versatile tool has the advantage of being operated with one hand and the handle will pivot for ease of use when working at an angle. Useful on vehicle maintenance, agricultural projects and construction.

Part No.	For use with rivet sizes:	Pack Qty.
2750	3.2mm (1/8"), 4.0mm (5/32"), 4.8mm (3/16")	1

2750HD Heavy Duty Lazy Tong Riveter

Fixed head riveter ideal for use with stainless steel rivets up to 6.4mm. This powerful and versatile tool has the advantage of being operated with one hand, providing no loss in efficiency. Useful on vehicle maintenance, agricultural projects and construction.

Part No.	For use with rivet sizes:	Pack Qty.
2750HD	3.2mm (1/8"), 4.0mm (5/32"), 4.8mm (3/16"), 6.4mm (1/4") and 6.4mm (1/4") Monobolts	1

Heavy duty and easy grip versions for engineering and light industrial use.

2730 Heavy Duty Riveter

Professional heavy duty riveter, best suited to engineering and maintenance projects. Supplied with 3 interchangeable noses.

Part No.	For use with rivet sizes:	Pack Qty.
2730	3.2mm (1/8"), 4.0mm (5/32"), 4.8mm (3/16")	1

2720 Heavy Duty Long Nose Riveter

A versatile variation of the 2730, with an extra long nose to facilitate access in recessed situations such as corrugated sheet. Supplied with 4 interchangeable noses.

Part No.	For use with rivet sizes:	Pack Qty.
2720	3.2mm (1/8"), 4.0mm (5/32"), 4.8mm (3/16")	1

2770 Easy Grip Riveter

Easy one-handed operation. Well suited to light engineering use, especially for the home and workshop, providing a professional finish.

Part No.	For use with rivet sizes:	Pack Qty.
2770	3.2mm (1/8"), 4.0mm (5/32"), 4.8mm (3/16")	1

Riveters

Traditional Riveters & Kits

Heavy duty and easy grip versions for engineering and light industrial use.

2780 Multi Head Riveter

- Universal riveter with rotating nose for easy rivet selection
- Versatile quick change system saves time in the workshop
- Dual position vertical or horizontal head for flexible working in tight spaces
- PVC dipped handles for a comfortable grip

Part No.	For use with rivet sizes:	Pack Qty.

2745C - Compact Threaded Insert Tool Kit (M3-M10)

The Compact Series has been developed to complement the more traditional range. Easily sets up to M10 Nutserts with more power and less effort than traditional Insert Tools

Allows thin sheet nutserts to be placed quickly and easily by hand. They are invaluable to Plant and Maintenance Engineers, and also for DIY, for simple assembly of threaded inserts or anchor nuts.

- Easily sets up to M10 Nutserts with more power and less effort than traditional Insert Tools
- Creates a strong, permanent and reliable threaded fixing for use with bolts, studs and screws etc.
- Ideal for inserting threaded nuts into steel, aluminium, plastic and wood
- Suitable for steel, stainless steel and aluminium nutserts
- Steel body, Chrome Molybdenum alloy steel mandrels and reinforced 2mm heat treated Carbon steel handles for strength and durability
- Features a knurled carbon steel knob to easily unload nutserts
- Small and compact. Ideal for restricted areas
- Ergonomic handles for extra comfort
- Requires access to only one side of the workpiece
- Colour coded mandrels for easy selection

*Typical drill hole sizes		
Mandrel Sizes		Drill Sizes
M3		6.1mm
M4		6.5mm
M5		7.2mm
M6		9.6mm
M8		10.6mm
M10		13.1mm

*Check with nutsert supplier for appropriate hole size.

- Kit Contains:**
- Threaded Insert Tool x 1
 - Interchangeable Mandrels x 6: M3, M4, M5, M6, M8 and M10
 - Multi-functional spanner x 1

2745C - User instructions

1

Pre-drill appropriate size hole in the material to be inserted

2

Open the handles and fit nutsert onto mandrel

3

Insert tool into pre-drilled hole

4

Close the handles to set nut in position

5

Open the handles and turn the knob clockwise to unload the insert tool from the inserted nut

2746C-HD - Compact Heavy Duty Threaded Insert Tool Kit (M3-M12)

The Compact Series has been developed to complement the more traditional range. Easily sets up to M12 Nutserts with more power and less effort than traditional Insert Tools

Allows thin sheet nutserts to be placed quickly and easily by hand. They are invaluable to Plant and maintenance Engineers, and also for DIY for simple assembly of threaded inserts or anchor nuts.

- Easily sets up to M12 Nutserts with more power and less effort than traditional Insert Tools
- Creates a strong, permanent and reliable threaded fixing for use with bolts, studs and screws etc.
- Ideal for inserting threaded nuts into steel, aluminium, plastic and wood
- Suitable for steel, stainless steel and aluminium nutserts
- Special rod structure between the handles makes it much easier to load and unload nutserts, saving time and effort in the workshop
- Steel body, Chrome Molybdenum alloy steel mandrels and reinforced 2mm heat treated Carbon steel handles for strength and durability
- Ergonomic handles for extra comfort
- Requires access to only one side of the workpiece so ideal for restricted spaces
- Colour coded mandrels for easy selection

*Typical drill hole sizes

2743 - Threaded Insert Setting Tool

Thin sheet setting tool designed to enable threaded nut inserts to be set easily by hand. Invaluable to maintenance engineers for on-the-spot repairs. Supplied in storage wallet complete with M4, M5, M6 and M8 nose bushes and mandrels.

- Insertion of permanent load bearing threads in materials from 0.20" to 0.128"
 - Simple set up and easy uniform stroke allows a nutsert to be set in thin sheet materials without causing surface damage
 - A comprehensive range of conversion kits and inserts are available
 - One side application
 - Flush mounting
- Permanent thread
 - Moisture resistant
 - Cost effective
 - Strong
 - Rapid
 - Vibration resistant
 - Portable

Torque Wrenches and Torque Multipliers

Eclipse Torque Wrenches & Multipliers offer torque setting solutions from 1 - 1500Nm for automotive and industrial applications. They are manufactured in the UK to the highest standards and quality control procedures and exceed international standards for accuracy.

Torque Wrenches

Eclipse Torque Wrenches

Eclipse Torque Wrenches are manufactured in the UK and incorporate the very latest design, manufacturing and quality control technology to achieve the highest level of innovation and precision.

Eclipse Torque Wrenches: Declaration of Conformance
A "Declaration of Conformity" for each Torque Wrench is individually packed with each product.

Global Service

Spear & Jackson are pleased to advise the availability of tool re-calibration services to the original factory standard at five locations on five different continents. The accredited laboratories are situated in the UK, Australia, USA, Singapore and China, and use the same equipment and procedures as the factory (which has UKAS accreditation).

Please contact: sales@eclipse-tools.com, for full details of the repair and re-calibration services available.

THE OFFICIAL MARK OF QUALITY

Eclipse torque wrenches conform to the most stringent quality standards set by UKAS (the UK Government body who set the laboratory standards for calibration services). The factory manufactures according to BSENISO6789-1:2017 and BSENISO6789-2:2017 which sets the standard for the technical competence of the original Testing laboratory.

This should not be confused with laboratories claiming ISO9001: 2015, as this standard relates only to a laboratory's quality management systems.

We guarantee all our tools and products against defective workmanship and materials so you can be sure of first class quality every time.

Torque Wrenches

Eclipse Torque tools

Torque is any force or system of forces that tends to cause rotation about an axis.

The Importance Of Torque Control

Although many methods exist to join two or more parts together, the ease of assembly and disassembly provided by threaded fasteners make them the ideal choice for many applications.

The object of a threaded fastener is to clamp parts together with a tension greater than the external forces tending to separate them. The bolt then remains under constant stress and is immune from fatigue.

However, if the initial tension is too low, varying loads act on the bolt and it will quickly fail. If the initial tension is too high, the tightening process may cause bolt failure. Reliability therefore depends upon correct initial tension. The most practical way of ensuring this is by specifying and controlling the tightening torque.

Measurement of Torque

Imagine someone tightening a bolt using a socket attached to a metre long bar. If they apply 10 kg of force (kgf) perpendicular to the bar they will produce a torque of 10 kgf.m at the axis (the centre of the bolt).

However, under the S.I. system of measurement, force is expressed in Newtons (N) rather than kgf. The conversion between kgf and N is x 9.807 so the person is applying 98.07 N.m of torque.

$$\text{Torque} = \text{Force} \times \text{Distance}$$

Example 1: Distance = 1m, Force = 100N, Torque = 100 N.m

Example 2: Distance = 2m, Force = 100N, Torque = 200N.m

Example 3: Distance = 1ft, Force = 100lbf, Torque = 100lbf.ft (or 100ft.lb)

Bolt Tension

When an assembly is clamped by tightening a nut and bolt, the induced tension causes the bolt to stretch. An equal force acts to compress the parts which are thus clamped.

The proof load of a bolt, normally established by test, is the load which just starts to induce permanent set - also known as the yield point. Typically bolts are tightened to between 75% and 90% of yield.

Torque Wrenches

Friction in the bolted joint

When a threaded fastener is tightened, the induced tension results in friction under the head of the bolt and in the threads. It is generally accepted that as much as 50% of the applied torque is expended in overcoming friction between the bolt head and the abutting surface and another 30% to 40% is lost to friction in the threads. As little as 10% of the applied torque results in useful work to tension the bolt.

Given that up to 90% of the applied torque will be lost to friction, it follows that any changes in the coefficient of friction resulting from differences in surface finish, surface condition and lubrication can have a dramatic effect on the torque versus tension relationship. Some general points can be made:

- Most torque tightened joints do not use washers because their use can result in relative motion between the nut and washer or the washer and joint surface during tightening. This has the effect of changing the friction radius and hence affects the torque-tension relationship. Where a larger bearing face is required then flange nuts or bolts can be used. If washers are to be used, hard washers with a good fit to the shank of the bolt give lower and more consistent friction and are generally to be preferred.
- Degreasing fasteners of the film of oil usually present on them as supplied will decrease the tension for a given torque and may result in shear of the fastener before the desired tension is achieved.
- Super lubricants formulated from graphite, molybdenum disulphide and waxes result in minimal friction. Unless allowance is made in the specified tightening torque, the induced tension may be excessive causing the bolt to yield and fail. However, used in a controlled manner, these lubricants serve a useful purpose in reducing the torque to produce the desired tension meaning that a lower capacity tightening tool can be used.
- For reasons of appearance or corrosion resistance, fasteners many be plated. These treatments affect the coefficient of friction and therefore torque versus tension relationship.
- Friction is often deliberately introduced into the fastener to reduce the possibility of loosening due to vibration. Devices such as lock-nuts must be taken into account when establishing the correct tightening torque.

As a rough guide, the calculated tightening torque should be multiplied by the factor from the table opposite according to surface treatment and lubrication.

Surface Condition Of Nut	Surface Condition Of Bolt			
	Untreated	Zinc	Cadnium	Phosphate
UNTREATED	1.00	1.00	0.80	0.90
ZINC	1.15	1.20	1.35	1.15
CADNIUM	0.85	0.90	1.20	1.00
PHOSPHATE & OIL	0.70	0.65	0.70	0.75
ZINC & WAX	0.60	0.55	0.65	0.55

Torque Wrenches

Recommended Maximum Torque Values

The information in the table below shows recommended torque values under normal conditions. For critical applications, further information and research will be necessary.

The following basic assumptions have been made:

- Bolts are new, standard finish, uncoated and not lubricated (other than the normal protective oil film)
- The load will be 90% of the bolt yield strength
- The coefficient of friction is 0.14
- The final tightening sequence is achieved smoothly and slowly

If lubrication is to be applied to the nut/bolt, multiply the recommended torque by the appropriate factor shown in the table on page 107.

Formulae

Accepted formulae relating torque and tension, based on many tests are:-

$$M = \frac{P \times D}{60}$$

M = torque lbf.ft
P = bolt tension lbf
D = bolt dia.ins

$$M = \frac{P \times D}{5000}$$

M = torque N.m
P = bolt tension Newtons
D = bolt dia.mm

These formulae may be used for bolts outside the range of the tables.

Formulae For Calculating The Effect Of Torque Wrench Extensions

M1 = M2 x L1/L2
Where L1 is the normal length and L2 is the extended length, M1 is the set torque and M2 the actual torque applied to the nut.

Example
The required torque on the fastener is 130 N.m (M2) but what do you set on the torque wrench scale?
L1 = 500 L2 = 650
(units of length not important, this is a ratio)
M1 = 130 x 500/650
M1 = 100

Torque Wrenches

Professional Torque Wrenches

A new and improved comprehensive range of Torque Wrenches for the professional user with finer adjustment than the standard range. Ideal for general workshop, garage and tyre shop applications.

Adjustment Lock

The lock is a push / pull type so it is faster to operate and for extra safety a coloured red band clearly indicates when the wrench is unlocked. The handle adjusts faster so less effort is required to set the Torque reading.

Timestrip

The handles also feature a Timestrip® which gives a visual indication that the wrench is due for calibration. (Timestrip® is a registered trademark of Timestrip UK Ltd)

Ratchet

Strength and Durability: Push through ratchet (EPTW series) with 60-72 engagements per revolution. Reversible ratchet (EATW series) with 48-72 engagements per revolution (depending on model).
Versatility: Push through square drive allows the wrench to be used for torque control in both clockwise and an anti-clockwise direction. Reversible ratchet allows torque control in tight spaces such as car maintenance.
Accuracy: Offset ratchet pawls give a narrow engagement angle

Torque Scale

The wrench has a dual scale for Torque settings in N.m and lbf.ft. The window is much larger than the previous model for higher visibility and more accurate setting.

Torque Mechanism

Accuracy: less parts to maintain when compared to 'pivot block' mechanisms. Accuracy: +/-3% exceeds all international standards for torque wrenches. Each wrench is supplied with a declaration of conformity. Ease of use: Simple calibration adjustments without disassembly

Torque Wrenches

Automotive and Industrial

Eclipse Automotive Torque Wrenches to control torque in confined spaces of modern motor vehicles and Industrial Torque Wrenches for heavy duty applications.

Eclipse Automotive Torque Wrenches

- Versatility:** The reversible ratchet is designed with compact dimensions and a arrow engagement angle resulting from the 72 tooth pattern. This makes the wrench ideal for use in confined spaces of modern motor vehicles and other applications where space is limited.
- Comfort & Safety:** two component ergonomic handle for comfort and slip resistance.
- Safety:** A robust lock prevents accidental adjustment of the wrench during use.
- Accuracy:** of +/- 3% exceeds all international standards for torque wrenches. Each wrench is supplied with a declaration of conformity.
- Durability:** Handle material and lens resist chemicals in common usage in the automotive, aviation and industrial environments.

Eclipse Automotive Torque Wrenches

- Accuracy:** +/-4%, even in arduous working conditions. Each wrench is supplied with a traceable calibration certificate. Large break angle improves accuracy by reducing the possibility of over torquing
- Safety:** Cam control of the mechanism gives a controlled break which will not throw the operator off balance
- Versatility:** Dual scaled – N.m & lbf.ft

Torque Wrenches

Industrial and Torque Screwdrivers

A range of Professional Industrial Torque Wrenches for precision applications requiring a higher torque, e.g truck and bus tyre shop applications and rail maintenance.

Eclipse Professional Industrial Torque Wrench - Ratchet Head

- Accuracy:** +/- 3% reading
- Ease of Use:** non length dependent - extension handle can be used to reduce operator effort (handle supplied as standard with 800, 1000 and 1500 N.m models)
- Accuracy:** long scale length in N.m and lbf.ft allows error free setting
- Versatility:** fine 60 tooth ratchet allows the wrench to be used in confined spaces
- Ease of Use:** positive 'click' can be heard, seen and felt
- Storage and Protection:** supplied in hard carry case

Eclipse Torque Screwdrivers

- Accuracy:** Tool 'slips' when torque is achieved, removing the possibility of over-tightening
- Ease of Use:** Straightforward torque adjustment without the need for additional specialist tools. Supplied with a 1/4" hexagon bit holder that is designed using a 4mm hexagon stem.
- Safety:** Includes a lock to prevent accidental adjustment of the set torque
- Versatility:** Bit holder is shaped for use in confined spaces
- Durability:** The handle is constructed from two materials; the strong base material is overlaid with a soft feel grip for comfort and slip resistance
- Reliability:** Exceeds the requirements of ISO6789

A Torque Multiplier is a device that increases torque that can be applied. Because the power output cannot exceed the power input, the number of output revolutions will be lower than the number of input revolutions.

What are the advantages of Torque Multipliers?

Safety: Using long levers can be very dangerous. Torque Multipliers reduce the lever length or operator effort by a factor of 5, 25 or 125.

Flexibility: Torque Multipliers are ideal for use in confined spaces where it may not be possible to fit long levers.

Accuracy: Torque is most accurate when it is applied smoothly and slowly. Torque Multipliers help to achieve this by removing much of the physical effort from the tightening task.

How do Eclipse HANDTORQUE™ Multipliers Work?

Eclipse Handtorque™ Multipliers incorporate an 'epicyclic' or 'planetary' gear train that has one or more stages. Each stage of gearing increases the torque applied by a factor of 5, so Eclipse multipliers typically offer ratios of 5:1, 25:1 and 125:1

With the planetary gear system, torque is applied to the input gear (known as the 'sun' gear), causing the three or four 'planet' gears whose teeth engage with the 'sun' gear to rotate. The outside casing of the multiplier (the annulus) also engages with the planet gear teeth and would normally rotate in the opposite direction to the sun gear.

However, a reaction arm prevents the annulus from rotating, allowing the planet gears to orbit around the sun. The planet gears are held in a 'planetary' carrier which also holds the input square drive so that, as the planet gears orbit around the sun gear, the carrier and therefore the square drive turn. Without the reaction arm to keep the annulus stationary, the output square will not apply torque.

Why choose an Eclipse HANDTORQUE™ Multiplier?

Accuracy and Reliability: Eclipse gearboxes are built to an extremely high standard of precision, with all gears rotating on needle roller bearings about hardened and ground journal pins. As a result, Eclipse Handtorque™ Multipliers have a torque multiplication accuracy of +/-4% throughout the operating range, taking the uncertainty out of high torque tightening.

Accuracy: No gearbox is 100% efficient and so the velocity ratio (the number of turns that the input has to make to achieve one revolution of the output) is not the same as the torque multiplication ratio. Eclipse multipliers are engineered such that each gear stage has a typical velocity ratio of 5.45:1, resulting in a true torque multiplication factor of 5:1.

Safety and Ease of Use: Torque output calculations on Eclipse multipliers are a matter of simple arithmetic, with little risk of incorrect bolt loading due to conversion errors. Unlike most other manufacturers' multipliers, there is no need for graphs or formulae to calculate the input torque required to achieve a particular output.

Eclipse Torque Multipliers are manufactured in the UK to extremely high standards of precision and accuracy. They offer a safe, flexible and accurate solution where high levels of torque measurement are required.

Eclipse HT3 'Highwayman' Torque Multipliers

- 5:1 torque multiplication with a guaranteed accuracy of better than +/- 4%.
- Two reaction bar styles for maximum versatility.
- Robust construction for minimum maintenance and a longer life.
- Spare 3/4" output square included in the 1300 N.m kit.
- Robust carry case ideal for inclusion in a heavy vehicle tool kit.

Pliers

Manufactured with induction hardened cutting edges to the highest specification and tolerances with ergonomic soft feel handles. Eclipse Pliers offer a perfect solution for most gripping, twisting and wire cutting jobs.

Pliers

Eclipse Pliers

An extensive range of Eclipse Pliers for cutting and twisting wire and gripping pipes, rods and other components for the professional user. Designed to give a greater grip when you need it most.

Pliers Cutting Key

Type of Wire	Example	Tensile strength ca. N/mm2
Soft wire	Copper, Aluminium	220 - 250
Medium hard wire	Iron wire	750 - 800
Hard wire	Steel wire	1700 - 1800
Piano wire	Hardened spring metal	2200 - 2300

Engineers' Pliers

Multipurpose pliers for cutting, gripping and twisting. Induction hardened cutting edges for cutting medium hard wire. Pipe grip for gripping pipes, rods and other components. Serrated jaw for gripping nuts, bolts, studs and similar objects. Joint cutter for cleanly cropping soft wire. Ergonomic soft feel handles.

Part No.	Size	Wire Cutting Thickness (mm)				Pack Qty.

VDE Tools

Eclipse high quality VDE approved cutters and pliers are manufactured from hardened and tempered drop forged steel and have an integrated hand stop, reducing the risk of contact with the metal head, ensuring a safe, high quality tool for the professional electrician.

VDE Tools

VDE Pliers & Cutters

The VDE Testing and Certification Institute (Verband der Elektrotechnik) is an internationally accredited independent organisation working to ensure the safety of electrical tools and machines.

A comprehensive range of high quality VDE approved cutters and pliers for the professional electrician. Each tool is VDE approved, meaning that it is individually tested to 10,000V for complete assurance of safety when working on live equipment up to 1,000V.

What products are VDE certified?

Only those that have been tested to strict criteria in the VDE Institute's Frankfurt based laboratories can be issued with the VDE Certification Mark.

How are VDE Tools Tested?

Each tool is individually tested to 10,000V for complete assurance of safety when working on live equipment up to 1,000V AC.

Why choose VDE tools?

They are designed specifically to reduce the risk of injury, as well as minimise the likelihood of damage to electrical circuitry.

Are Insulated tools VDE approved?

'Insulated' only means that a tool is coated with a material that is not a conductor of electricity. Only VDE marked tools have passed the rigorous tests set by the VDE Testing and Certification Institution. Also beware of tools that claim to be VDE purely on the basis of their compliance with IEC 60900; this does not carry the assurance of safety through independent product testing and production auditing.

Caring for VDE Tools

Always visually inspect VDE tools before use. If the insulation is damaged or marked in any way, the tool should not be used near live electrical circuits. To ensure satisfaction from this product, it should be kept clean and carefully stored in a contaminant free, dry environment.

How do I recognise VDE tools?

This shows compliance with VDE regulations concerning safety requirements. Confirms safety with regards to electrical, mechanical, thermal, toxicological, radiological and other hazards.

The double triangle and voltage show that the tool is suitable for working on energised parts at the stated voltage.

IEC 60900:2004

An international standard that includes the detailed requirements for the design of insulated tools, eg. the thickness of the protective insulation and the testing programme required on this material.

Integrated hand stop increases safety by reducing the risk of contact with the metal head

Manufactured from hardened and tempered drop forged steel for maximum strength and durability

Induction hardened and precision ground edges for maximum durability and performance

Handle is ergonomically designed to offer the optimum balance between grip and comfort

EAWS6 Automatic Wire Strippers

A multipurpose tool for use on both flat cable and round flex cable. combines stripping, crimping and cutting

- Strips wire with no need for adjustment
- Crimping jaws can be use on both insulated and non-insulated terminals
- The steel blades of the jaws are designed to cut wire and are hardened to ensure a longer working life. The micro-adjustment mechanism allows for the stripping of wire less than 0.2mm²

Stripping 0.2 - 6.0mm² copper and aluminium wire, solid or stranded

Wire Cutting HRC 40-50

Crimping 1.5, 2.5, 6.0mm insulated and non-insulated terminals

ECT-RBY Ratchet Crimping Pliers

For crimping open cable insulated terminals

- The head has colour coded recesses of red, blue and yellow for different insulated terminals
- Made from high quality carbon steel with a hardened black oxide finish to ensure maximum strength and durability
- A high compression pressure and an adjustment mechanism enable fast and effective crimping
- Soft feel handles offer comfort and a secure grip

EVS1000 Voltage Sensor

For safely checking the presence of voltage in cables, wall sockets, fuses, circuit breakers and junction boxes

- When placed closed to AC voltage it lights up red and detection buzzer sounds
- Pocket clip enables convenient storage
- Over-voltage CAT III and compliance with IEC 1010
- Can pick up a 5v signal and detect 240v through an air gap of 4mm
- Operating temperature -20° to + 55°C
- Requires 2 x AAA batteries (Not supplied)

The Eclipse Professional Tool Case range

Keeping all your tools safe and organised. Perfect for any professional tradesman.

Professional Tool Case

Eclipse TECHCASE

Heavy duty tool case's ideal for service engineers, electricians, technicians

TECHCASE Professional Tool Case

- Designed to carry both tools and technical equipment
- Made from 600 denier polyester for maximum strength and durability
- The padded laptop compartment of the Techcase is designed to protect sensitive equipment
- The internal compartments and loops are designed to carry tools, power tool accessories, documents and technical equipment
- The internal document pocket is ideal for carrying A4 sized documents
- Padded carry handle and adjustable / detachable shoulder strap for extra comfort
- The industrial grade metal hook on the strap adds strength when carrying heavy loads
- 6 protective rubberised feet on the bottom of the bag

The Eclipse Engineers' Tools range

All manufactured to the highest standards from high quality carbon steel, Eclipse Engineering tools include punches, scrapers, scribers, boring bars and tool bits for the professional user.

Engineers' Tools

Punches

All Eclipse Punches are made from a high quality carbon steel. The point is hardened and tempered to withstand continuous use. All punches have well cut knurling to provide positive finger grip.

Centre Punches

Used to indent, mark, scribe lines and to make indentations in work pieces prior to drilling. Punch point accurately ground to an angle of 90°

Part No.	Point Diameter	Length	Pack Size
351A	3.2mm (1/8")	100mm (4")	10
351B	4mm (5/32")	100mm (4")	10

Nail & Pin Drivers

Two quality drivers for pushing home nails and pins when using a hammer would be hazardous or cause damage. Magnetic head holds the nail in place, and spring return allows automatic thrusting of nail below material surface. Pistol grip handle for extra secure grip. 2.5mm: for pushing home panel pins and nails up to 2.5mm diameter. 4mm: for nails up to 4mm diameter.

9180	Pin Driver	2.5mm (3/32")	6
9185	Nail Driver	4mm (5/32")	6

Engineers' Tools

Scrapers, Pin Vices, Chucks & Collets

Hand scrapers are designed for the removal of high spots on machined surfaces to give a smoother surface on slideways, bearings, cast iron surface plates and precision marking out plates.

Engineers Scrapers

Engineers' Tools

Scribers & Jewellers' Screwdrivers

Eclipse professional scribers used in metal working to mark lines in workpieces prior to machining. Jewellers' Screwdriver blades are hardened for long life.

76-229R Handy Scriber

Double ended with pointed and knife-edge ends. Suitable for marking and scoring most materials including wood, metal, laminates and plastics.

Part No.	Overall Length	Pack Size
76-229R	175mm (7")	5

E222 Engineers' Scriber

Double ended for marking out in confined spaces, e.g. grooves.

7772	Pocket set: 1 screwdriver & 6 interchangeable blades with widths from 0.6mm - 2.5mm	1 Set

Engineers' Tools

Tool Bits & Boring Bars

Eclipse Boring Bars and Tool Bits are manufactured from 5% Cobalt High Speed Steel for the professional engineer.

Boring Bars

Made from 5% cobalt high speed steel. Shank ground on underside to provide a flat surface for ease of setting and to ensure rigidity when used in a tool post. Ends ground ready for use.

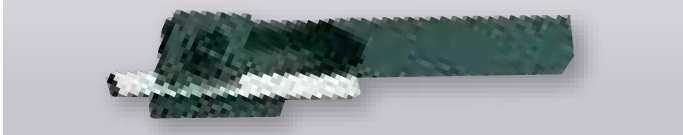

Part No.	Diameter	Length	Pack Size
TK105B/10	5mm (3⁄16")	114mm (4½")	10
TK146C/10	6.5mm (¼")	127mm (5")	10
TK188P/10	8mm (5⁄16")	153mm (6")	5
TK230J/10	9.5mm (3⁄8")	178mm (7")	25

Tool Bit Holders

Eclipse tool bit holders are designed to optimise toolbit performance by means of a carefully machined groove with relieved corners which enables the tool bit to rest on a flat surface. Eclipse holders clamp the tool bit securely and rigidly. Supplied complete with an Allen key and one Eclipse H5 tool bit, 1per pack.

Holders with the suffix "SL" are designed for use in American style (slotted pillar) tool posts. Holders with suffix "S" are of more robust construction and are designed for use with English type lathes with flat tool rests or 4 way turret tool posts.

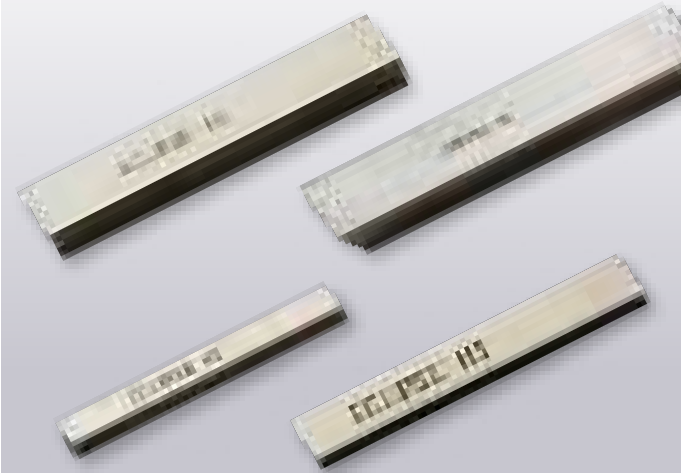

Part No.	Capacity	Shank Size	Overall Length
524SL	5-7mm (3⁄16 - 1⁄4")	11.1x 25.4mm (7⁄16 x 1")	130mm (5 1⁄8")

533S	8-10mm (5⁄16 x 3⁄8")	17.5x25.4mm (11⁄16 x 1")	155mm (6")

Tool Bits

Eclipse tool bits have a 5% cobalt content to give optimum hardness, grindability and cutting performance. Square tool bits can be used in lathes and shaping machines. Round tool bits used in internal boring bars and slotting machines. Tool bits manufactured to ISO5421.

Dimensions quoted are approximate, actual dimensions being slightly more than the nominals quoted. We recommend that tool bits be ground under a copious flow of coolant

Engineers' Tools

Tap Wrenches & Accessories

These tools are designed to hold engineers taps. By selecting the most suitable type and size it is possible to tap a hole more efficiently and minimise the risk of tap breakage.

33 Trammel Heads

Supplied as 1 pair of heads. Suitable for laying out the distance between two points and scribing arcs and circles. To be used in conjunction with any wood off cut between 3/4" to 1 1/2" wide, minimum thickness of 3/8".

Part No.	Suitable For Beam Sizes	Pack Size

Chisels and Wrecking Bars

Specifically designed for cutting brick, concrete, paving slabs and metal, the Eclipse range of top quality cold chisels and bolsters is manufactured to British Standard specifications using the latest production methods and equipment

Chisels & Wrecking Bars

Eclipse Wrecking Bars

Eclipse Wrecking Bars are made from heat treated, solid forged steel for maximum strength.

- The 30" and 36" are for demolishing large timber structures and dismantling concrete and metal constructions.
- The 18" and 24" size are ideal for demolishing plasterboard, dismantling timber frames and pulling up floorboards.
- The light duty 14" is designed to pull large nails and prise or dismantle constructed items.

Chisels & Wrecking Bars

Cold Chisels

For general cutting and chipping of metals, and for shaping, facing and cutting of stonework. Eclipse Cold chisels and bolsters are manufactured from hard-wearing Chrome Vanadium so need less resharpener. To resist 'mushrooming' every chisel shank head is specially shaped and the cutting edges are hardened for durability.

Welding Clamps and Accessories

We have utilised our expertise in magnetics to re-engineer traditional methods of clamping during welding, assembly or repair. We now offer a range of options to suit different angles, workpiece size or configuration.

* For export markets only.

Magnetic Welding Clamps & Accessories

The fast, safe, efficient way to hold steel workpieces

Applying magnetics to welding aid design improves efficiency, productivity and ultimately profitability, delivering key benefits:

- **Speed & Simplicity** - easy, fast set-up, no manual clamping or mounting holes. Switchable style ensures easy precise adjustment
- **Safe** - high strength magnets ensure secure clamping
- **Versatile** - some models suitable for different angles and material configuration
- **Access** - minimal surface contact ensures maximum access to the workpiece
- **Durability** - permanent magnets require no maintenance, just simple wipe down cleaning

Typical use

Quick Holding Clamp Switchable

- Features ON/OFF switches
- The fast & easy way to hold metal workpieces at 45°, 90°
- Turn the magnet OFF or at the midpoint position when setting up, turn ON when you're ready to work
- Fast and safe set-up!
- Ideal for round and square tubing, angle, and flat stock
- Simple wipe clean design

Part No.	Angles	Dimensions mm	Weight kg	Pull Force* kg
QHCSS	45°, 90°	111 x 95 x 29	0.7	40
QHCSL	45°, 90°	152 x 130 x 35	1.4	75

* Magnetic force is based on the longest side of magnet with 10mm thick steel.

NEW

NOTE: Must be used for tack welding only and removed before completing weld. Avoid prolonged exposure of magnetic products to heat sources of 356°F / 180°

90° Fixed Welding Clamps Switchable

For professional jobs that demand strong hold down forces. Holds flat and round metal work pieces.

- Convenience of ON/OFF switches
- Two ON/OFF switches for independent operation
- Easy and safe set-up!
- Machined flat and V-surfaces are ideal for round and square tubing, angle, and flat stock
- Heavy duty construction

Part No.	Angles	Dimensions (mm)	Weight (kg)	Pull Force* (kg)
FWCSS	90°	152 x 152 x 38	1.2	55
FWCSL	90°	197 x 197 x 48	2.7	120

*Magnetic force is based on 10mm thick steel.

Inside and Outside Welding Clamps

- Hold and position sheet metal, round pipes, square, angled or flat stock
- The Inside and Outside Welding Clamps are constructed from two independent rectangular magnets for consistent, undiminished magnetic force when both sides are attached to workpieces
- Use mounting holes to link two magnets together for use as fixturing elements
- Use hex hole on magnet for breakaway leverage

Part No.	Angles	Height mm	Width mm	Thickness mm	Weight kg	Pull Force kg
IOWCC*	30°, 60°, 90°	75.5	52	14	0.13	9

Terms & Conditions

Conditions of Sale (For orders within the United Kingdom and Overseas) In these conditions 'The Seller' means Neill Tools Limited being the Company by whom these goods are sold.

1. GENERAL

(a) The Seller's quotations are not binding on the Seller and a contract ('the contract') will only come into being: (i) in the case of orders to be delivered within the United Kingdom, upon acceptance by the Seller of the Customer's order; or (ii) in the case of orders to be delivered outside the United Kingdom, upon whichever shall be the later of acceptance in writing by the Seller of the Customer's order or notification to the Seller that any letter of Credit (which the Seller may have requested prior to written acceptance of the order) has been opened and that any necessary export or import licence or exchange permit has been granted and the following conditions shall be deemed to be incorporated therein. **(b)** The Contract will be subject to these conditions. All terms and conditions appearing or referred to in the Customer's order or otherwise stipulated by the Customer shall have no effect. Any variation of the contract must be confirmed in writing by the Seller.

2. PRICES

(a) Where the goods are sold by reference to the Seller's published price list the price payable for the goods shall be the ruling price as published in the price list current at the date of despatch of the goods from the Seller's premises (in the case of orders to be delivered within the United Kingdom) or in the price list current at the date of written acknowledgment of the Customer's order by the Seller (in the case of orders to be delivered outside the United Kingdom). **(b)** In other cases the price stated in the contract is based on the cost to the Seller of raw materials, fuel and power, transport and labour and all other costs at the date of acceptance of the order or quotation (whichever is earlier). If at the date of despatch of the goods from the Seller's premises there has been any increase in all or any of such costs the price payable for (the goods may at the request of the Seller be increased accordingly. **(c)** Where the price for the goods is varied in accordance with this condition the price as varied shall be binding on both parties and shall not give either party any option of cancellation. **(d)** Unless specifically agreed otherwise there shall be added to the price for the goods any value added tax and any other tax or duty relating to the manufacture, transportation, export, import sale or delivery of the goods (whether initially charged on or payable by the Seller to the Customer). The price for the goods includes delivery to the Customer's works or in the case of orders from outside the United Kingdom the price includes delivery F.O.B. UK port. Where expedited delivery is required by the Customer, the extra cost for the expedition of the delivery shall be borne by the Customer and added to the price for the goods. **(e)** Quotations in a currency other than Sterling are based on the rate of exchange fixed by the Seller at the time of acknowledging in writing the Customer's order and unless otherwise stated the price may be subject to revision by the Seller up or down if any different rate of exchange is ruling at the date of invoice

3. TERMS OF PAYMENT

Prices quoted are net and are in Sterling unless otherwise agreed Subject to credit being approved accounts are due for payment not later than the end of the month following the month of invoice otherwise payment must be received by the Seller before delivery. When deliveries are spread over a period each consignment will be invoiced as dispatched and each month's invoices will be treated as a separate account and be payable accordingly. Failure to pay for any goods or for any delivery or instalment shall entitle the Seller to suspend further deliveries and work both on the same order and on any other order from the Customer without prejudice to any other right the Seller may have. The Seller also reserves the right to charge interest on overdue accounts at the rate of 2% per month. The Seller reserves the right where genuine doubts arise as to a Customer's financial position or in the case of failure to pay for any goods or any delivery or instalment as aforesaid to suspend delivery of any order or any part or instalment without liability until payment or satisfactory security for payment has been provided. Where goods are to be delivered outside the United Kingdom payment must be made against delivery of the goods or shipping documents F.O.B. UK Port unless credit arrangements within the United Kingdom approved by the Seller have been made.

4. TITLE TO GOODS

(a) Legal and beneficial ownership of goods shall remain with the Seller until payment in full has been received by the Seller. (i) for those goods (ii) for any other goods supplied by the Seller (iii) of any other monies due from the Customer to the Seller on any account. **(b)** Until property in the goods passes to the Customer under paragraph (a) above the Customer Shall: (i) be bailee of the goods (ii) keep the goods separately and readily identifiable as the property of the Seller **(c)** (i) Notwithstanding paragraph (a) above the Customer may (as between it and its customer only) as principal in the ordinary course of its business sell the goods by bonafide sale at full market value or in the ordinary course of its business use the goods. (ii) Goods shall be deemed sold or used in the order delivered to the Customer. (iii) Without prejudice to (c)(ii) above, any resale by the Customer of goods in which property has not passed to the customer shall (as between the Seller and the Customer) be made by the Customer as agent for the Seller. **(d)** (i) If goods in which property has not passed to the Customer are mixed with or incorporated into other goods the property in those other goods shall be held on trust by the Customer for the Seller to the full extent of the sums recoverable by the Seller under paragraph (a) above. (ii) The proceeds of sale of any goods and any other goods referred to in paragraph (d)(i) above shall be held by the Customer in trust for the Seller to the extent of all sums recoverable by the Seller under paragraph (a) above. (iii) The Customer shall keep any proceeds of sale as referred to in paragraph (d) (ii) above in a separate account and the Seller shall have the right to trace such proceeds. (iv) Upon accounting to the Seller for the entire proceeds of sales made under paragraphs (c)(iii) and (d)(i) above the Customer will pay to the Seller a commission equivalent to the difference between the sums owed to the Seller and the value of such proceeds. **(e)** The Customer assigns to he Seller all rights and claims the Customer may have against it own customers and others in respect of goods specified in paragraphs (c)(ii) and (d)(i) above. **(f)** At any time prior to property in goods passing to the Customer (whether or not any payment to the Seller is then overdue or the Customer's otherwise in breach of any obligation to the Seller) the Seller may without prejudice or any other of its rights: (i) retake possession of all or any part of the goods and enter any premises for that purpose (or authorise others to do so) which the Customer hereby authorises (ii) require delivery up to it of all or any part of the goods (iii) terminate the Customer's authority to resell or use the goods forthwith by written notice to the Customer which authority shall automatically terminate (without notice) upon any insolvency of the Customer or it going into liquidation (as defined in the insolvency Act 1986) or it having a receiver or administrative receiver appointed or it becoming subject to an administration order or calling a meeting of its creditors or any execution or distress being levied on goods in its possession. **(g)** The Seller may at any time appropriate sums received from the Customer as it thinks fit notwithstanding any purported appropriation of the Customer. **(h)** Each paragraph and sub-paragraph of this clause is separate severable and distinct.

5. WARRANTY - LIMIT OF RESPONSIBILITY;

(a) The Seller warrants that it will (at the Seller's choice) either repair or replace or refund the full purchase price of any goods which are found in relation to the supply of goods within a period of 12 months from despatch of such goods from the Seller's premises (the warranty period) to be defective or not in accordance with the contract or any express description or representation given or made by or on behalf of the Seller in respect of the goods save that this warranty shall not apply where the defect or fault is attributable to defective materials supplied by third parties where the Customer's only remedy will be against that third party. The Customer's remedies in respect of any claim under the foregoing express warranty or any condition or warranty implied by law or any other claim in respect of the goods or any workmanship in relation thereto (whether or not involving negligence on the part of the Seller) shall in all cases be limited to repair, replacement or refund of the purchase price as aforesaid and any condition or warranty implied by law shall cease to apply after the expiry of the warranty period; and the Seller shall not in any circumstances be liable for any damages, compensation, costs, expenses, losses or other liabilities, whether direct or consequential, and any other remedy which would otherwise be available in law is hereby excluded except to the extent that such exclusion is prohibited by any rule of law. A claim in respect of any defect or failure to comply with the

specification or in respect of any delivery or instalment of any order or any part thereof shall not entitle the Customer to cancel or refuse delivery of or payment for any other order, delivery or instalment or any part of the same order, delivery or instalment. **(b)** Any guarantee or warranty expressly given to the end-user of any product made by the Seller is expressly excluded from these conditions and shall not be for the benefit of the Customer.

6. DELIVERY AND COMPLETION DATES

(a) The delivery dates specified in the contract are approximate only and unless otherwise expressly stated, time is not of the essence for delivery. The Seller will not be liable in any circumstances for the consequences of any delay in delivery or failure to deliver. **(b)** No delay shall entitle the Customer to reject any delivery or any further instalment or part of the order or any other order from the Customer or to repudiate the contract or the order.

7. DAMAGE - SHORTAGE OR LOSS IN TRANSIT

(a) In the case of sales to Customers within the United Kingdom risk in the goods passes on despatch from the Seller's works and the Seller accepts no responsibility for any damage or loss in transit. Where relevant claims for damage or loss in transit should be made on any carrier employed by the Seller and any conditions imposed by such carrier in relation to claims for damage or loss in transit should be complied with. **(b)** In the case of sales to Customers outside the United Kingdom risk passes at the point specified in the contract and the Seller will entertain a claim by the Customer in respect of loss or damage in transit only if the Customer: (i) gives written notice to the Seller within 21 days of non-delivery or within 7 days of the delivery in any other case and; (ii) where the goods are transported by an independent freight carrier, complies in all respects with the freight carrier's conditions of carriage for notifying claims for loss or damage in transit.

8. DELAYED ACCEPTANCE

If for any reason the Customer is unable to accept delivery of the goods when the goods are due and ready for delivery the Seller may arrange storage of the goods at the Customer's risk and the Customer shall be liable to the Seller for the, reasonable costs (including insurance) of such storage. This provision is without prejudice to any other right which the Seller may have in respect of the Customer's failure to take delivery of the goods or pay for them in accordance with the contract.

9. TERMINATION

If the Customer enters into a deed or arrangement or commits an act of bankruptcy or compounds with his creditors or if a receiving order is made against him or (being a company) it shall pass a resolution or the Court shall make an order that the Customer shall be wound up (otherwise than for the purposes of amalgamation or reconstruction) or shall become subject to an administration order or if a receiver (including an administrative receiver) shall be appointed of any of the assets or undertaking of the Customer or if circumstances shall arise which entitle the Court or a Creditor to appoint a receiver (including an administrative receiver) or a manager or which entitle the Court to make a winding up order or if the Customer takes or suffers any similar action in consequence of debt or if the financial responsibility of the Customer shall in the opinion of the Seller become impaired or if the Customer shall commit any breach of any part of the contract the Seller may without prejudice to its rights and remedies hereunder stop all goods in transit and suspend further deliveries and by notice in writing to the Customer may forthwith terminate the contract.

10. TOLERANCES AND TESTS

Unless otherwise specifically agreed all tests, test pieces and inspections whatsoever required by the Customer will be charged extra. All tests and inspections (whether or not being tests of chemical composition) shall take place under the Seller's standard testing arrangements, and such tests shall be final. All tests are subject to analytical tolerances.

11. PATENTS

The Customer shall indemnify the Seller against all actions, costs (including the cost of defending any legal proceedings) claims proceedings, accounts

and damages in respect of any infringement of alleged infringement of any patent, registered design, unregistered design, design right, copyright, trademark or other industrial or intellectual property rights resulting from compliance by the Seller with the Customer's instructions, whether express or implied.

12. INDEMNITY

The Customer agrees upon demand to indemnify the Seller against all losses, damages, injury, costs and expenses of whatever nature suffered by the Seller to the extent that the same are caused by or related to (i) designs, drawings or specifications given to the Seller by the Customer in respect of goods produced by the Seller for the Customer; or (ii) defective materials or products supplied by the Customer to the Seller and incorporated by the Seller in goods produced by the Seller for the Customer; or (iii) the improper incorporation assembly, use, processing, storage or handling of goods by the Customer.

13. NON-STANDARD ORDERS

Where the Customer orders goods or materials of a type, size or quality not normally produced by the Seller will use all reasonable endeavours to execute the order, but if it proves impossible, impracticable or uneconomical to carry out or complete the order, the Seller reserves the right to cancel the contract or the uncompleted balance thereof in which event the Customer will only be liable to pay for the part thereof actually delivered.

14. PATTERNS, DIES, TOOLS, DRAWINGS & EQUIPMENT

(a) Where the Customer supplies patterns, dies, tools, drawings or equipment the Seller shall be entitled to assume that the same are in good condition, true to drawing and entirely suitable to the Seller's methods of production, and for the production of the goods ordered in the quantities required. **(b)** While the Seller uses all reasonable endeavours to verify patterns, dies, tools, drawings and equipment supplied by the Customer no responsibility is accepted by the Seller for their accuracy. **(c)** All replacements, alterations and repairs to the Customer's patterns, dies, tools, drawing and equipment shall be paid for by the Customer. **(d)** Where the patterns, dies, tools, drawings and equipment are not supplied by the Customer only those which are specially made by the Seller and separately charged to the Customer in full shall, when paid for by the Customer become the property of the Customer. **(e)** Carriage on patterns, dies, tools and equipment supplied by the Customer will be paid by the Seller in one direction only. **(f)** The Seller will take all reasonable care of the Customer's patterns, dies, tools, drawings and equipment while in the Seller's possession but does not accept liability for loss or damage there to, howsoever arising, except where neglect on the part of the Seller or its agents was the direct cause of loss or damage and in those circumstances the Seller's liability shall be limited to the actual cost of replacement or repair to the exclusion of all other expenses, consequential losses, loss of profits and other expenses, liabilities and losses howsoever arising. **(g)** The Seller reserves the right to destroy or otherwise dispose of patterns, dies, tools, drawings and equipment in its possession of custody (whether or not the property of the Customer) from which the Customer has not required goods to be made for a period of 12 months or more in the case of patterns and three years or more in all other cases.

15. PACKING

The Seller uses its best endeavours to ensure, where necessary suitability of packing before despatch but no claim will be accepted by the Seller for breakage or damage in transit on the ground of alleged unsuitability for packing.

16. SUB-CONTRACTING

The Seller shall be entitled to sub-contract any work relating to the contract without obtaining the consent of, or giving notice to, the customer.

17. APPLICABLE LAW

The contract shall in all respects be governed by and construed in accordance with English Law and the Customer hereby submits to the non-exclusive jurisdiction of the English Courts.
